Such screening would normally include landscaping or permanent fences of solid materials and be located as far from property lines as reasonably possible. Such screening may not be required for roof fans, vents, and skylights which do not extend more than 18 inches above roof lines of multi-family residential, warehousing, manufacturing, assembling, processing, or servicing facilities, if, in the sole judgment of the Architectural Control Committee (confirmed in writing), such fans, vents, or skylights are architecturally acceptable and do not detract from the quality of the area or from the external appearance of the structure.

(2) No antenna or tower shall be erected on any property for any purpose without prior written approval from the Architectural Control Committee.

(3) Any and all lines and/or wires for communication or for transmission of sound or current, not within a building, shall be constructed or placed and maintained underground. h. Loading Docks and Areas.

(1) Loading docks and areas shall not be located on the street side of any building or structure, except that the Architectural Control Committee may approve such location in writing (subject to express screening requirements).

(2) Loading areas may not encroach setback areas, except that Declarant may approve such encroachment in connection with the approval of side street loading areas for corner buildings.

(3) Loading docks and areas shall be screened in a manner approved in writing by Declarant, considering such things as location (street side, rear, etc.) and views from adjacent and nearby properties.

i. Exterior Illumination. Illumination will be required on all exterior walls facing public streets or proposed public streets and for all parking areas and walkways between buildings and parking areas unless otherwise waived or modified by Declarant in writing. All exterior illumination must conform

to plans approved in writing by the Architectural Control Committee pursuant to Article IV of the Declaration.

j. Construction Standards.

(1) All building sides must be faced with face brick or stone, or with such other quality face materials as may be approved in writing by the Architectural Control Committee. Windows shall not be glazed or reglazed with mirrored or reflective glass without prior written approval of the Architectural Control Committee.

(2) Construction must conform to plans and specifications approved in writing by the Architectural Control Committee pursuant to Article IV of the Declaration. Normally, such approval will be limited to those plans which:

- (a) Do not include wooden frames except in the case of multi-family residential structures;
- (b) Provide adequate fire protection systems;
- (c) Provide for all underground utilities (public and private);
- (d) Preserve the quality and atmosphere of the area and do not detract from adjacent property;
- (e) Do not include exterior fire escapes;
- (f) Do not make extensive use of reflective or mirrored glass.

(3) Each dwelling unit shall contain a trash compactor and a water flushing garbage grinder disposal.

(4) Each commercial building, complex of buildings, or separate commercial business enterprise shall have a trash compactor on the premises adequate to handle the trash and waste items generated, manufactured, or acquired thereon by such commercial activities. The sorting, removing, and disposing of all such waste materials must be housed or screened in a manner approved in writing by the Architectural Control Committee. All facilities and plans for the disposal of wastes other than by public sewerage methods (such as shredding, compaction, incineration, reclamation, or chemical dissolution) must be approved in writing by the Architectural Control Committee.

(5) Each kitchen facility within a commercial building or complex of buildings shall contain a water flushing garbage grinder disposal.

(6) All structures will be equipped with gutters, downspouts, and/or other drainage conveyances.

(7) No excavation shall be made except in conjunction with construction of an improvement. When such improvement is completed, all exposed openings shall be back filled and graded.

(8) Once commenced, construction shall be diligently pursued to the end that it may not be left in a partly finished condition any longer than reasonably necessary.

3. The Declaration, except as expressly modified herein, remains in full force and effect and is hereby ratified and confirmed.

EXECUTED as of the day and year first written above.
